

Health Facility Guidelines

Template - Role Delineation Matrix

XYZ Hospital

Introduction:

Role Delineation refers to a level of service that describes the complexity of the clinical activities undertaken by that service. The level is determined by the presence of medical, nursing and other health care personnel who hold qualifications compatible with the defined level of care.

Each level of service has associated minimum standards, support services and staffing profiles considered appropriate.

Role delineation is a process that ensures that clinical services are provided safely, and are appropriately supported by the provision of adequate staffing numbers and profiles, minimum safety standards and other requirements.

Levels of Service range from 1 to 6 for each major clinical activity or support service associated with health facilities with Level 0 referring to the lowest complexity service and Level 6 describing the most complex.

Those services not identified will generally follow the Role Delineation of the particular hospital or facility they are applicable to. A hospital or health care facility is deemed to be at a particular level when the majority of clinical and support services provided are of that particular level.

SPECIALITIES AND SUB-SPECIALITIES					
MEDICAL			SURGICAL		
Generalist	Type I Sub-specialties	Type II Sub-specialties	Generalist	Type I Sub-specialties	Type II Sub-specialties
<ul style="list-style-type: none"> ▪ Physician 	<ul style="list-style-type: none"> ▪ Cardiology ▪ Dermatology ▪ Endocrinology ▪ Gastroenterology ▪ Geriatric medicine ▪ Neurology ▪ Renal Medicine ▪ Rheumatology ▪ Venereology ▪ Paediatrics ▪ Respiratory Medicine 	<ul style="list-style-type: none"> ▪ Clinical Haematology ▪ Clinical Microbiology ▪ Immunology ▪ Medical Oncology ▪ Palliative Care ▪ Radiotherapeutic Oncology ▪ Genetics ▪ Clinical Infectious Diseases 	<ul style="list-style-type: none"> ▪ General Surgeon 	<ul style="list-style-type: none"> ▪ Ear, Nose and Throat ▪ Obstetrics and Gynaecology ▪ Ophthalmology ▪ Orthopaedics ▪ Urology 	<ul style="list-style-type: none"> ▪ Cardiothoracic ▪ Neurosurgery ▪ Plastic Surgery ▪ Transplant Surgery ▪ Vascular Surgery ▪ Burns

ROLE DELINEATION LEVEL (RDL) – INPATIENT SERVICES	
1	Outpatient care – RN and visiting GP. In remote areas, possibly support via telephone
2	Outpatient and inpatient care – plus 24 hour GP cover and limited visiting general specialists for outpatient services only
3	Outpatient and inpatient care – plus visiting general specialists (low risk obstetrics and elective surgery)
4	Outpatient and inpatient care – plus resident general specialists, plus visiting Type I subspecialists, plus some junior medical staff
5	Outpatient and inpatient care – plus visiting Type II sub-specialists, plus some medical staffing, plus High Dependency Unit (HDU). May include some research and training.
6	Statewide services, including Type II sub-specialists and research / education/training

ROLE DELINEATION LEVEL (RDL) – AMBULATORY CARE SERVICES	
1	GP only
2	GP and outpatient clinic at discharge hospital. Limited access to generalist domiciliary nursing
3	Visiting specialist. Some hospital avoidance / hospital substitution. Some early discharge services. Access to generalist domiciliary nursing and some allied health
4	Links with Home and Community Care services. Increasing range and complexity of hospital avoidance / substitution/early discharge. Chronic disease programs. Visiting medical specialist. Good access to generalist allied health / nursing staff
5	Specialist medical / nursing / allied health staff. Increased range and complexity. HACC integration. Enhanced diagnostics. Teaching and training role
6	Research role. Fully integrated ambulatory care services. Fully integrated diagnostics

The Indian Health Facility Guidelines recommends the use of **HFBS** “**Health Facility Briefing System**” to edit all room data sheet information for your project.

HFBS provides edit access to all HFG India standard rooms, departments, and more than 40 report templates.

HFBS Health Facility Briefing System

Briefing Module

The Health Facility Briefing System (HFBS) has numerous modules available via annual subscription. It suits healthcare Architects, Medical Planners, Equipment Planners Project Managers and Health Authorities.

Use the HFBS Briefing Module to quickly drag in health facility departments or pre-configured room templates from the HFG standard, edit the room features such as finishes, furniture, fittings, fixtures, medical equipment, engineering services. The system can print or download as PDF more than 100 custom reports including room data sheets, schedules, and more...

To learn more about the HFBS web-based Healthcare Briefing and Design Software and to obtain editable versions of the “Standard Components” including Room Data Sheets (RDS) and Room Layout Sheets (RLS) offered on the HFG website, signup for HFBS using the link below.

Get Started Now:
hfbs.healthdesign.com.au

- ✓ HFG India Room Data Sheets and Departments are instantly editable in the HFBS software available online in the HFBS India Domain.
- ✓ You can access hundreds of report templates to print your HFG India room data in HFBS.
- ✓ HFBS has a onetime free 3 day trial available to all new users – signup for the HFBS India Domain today.
